

Field Support & engineering services

Turbine Services Limited employs a wide range of experienced gas turbine field engineers, technical advisors, construction and logistics managers, providing our clients with expert personnel to undertake and deliver both on-site and remote engineering services, meeting their needs for planned and unplanned plant maintenance.

CHROMALLOY | TURBINE SERVICES | 2014

Engineering services include:

- Turnkey plant overhaul
- Site management
- Operation & maintenance
- Control systems
- Electrical engineering
- Mechanical engineering
- Quality assurance & advice
- Fuel conversions
- Technical support
- Generator overhauls
- Plant commissioning
- Inspection & plant overhaul
- Field refurbishment
- Total maintenance concepts
- Plant uprate & improvement
- Control retrofits
- Plant relocation

All types of operation and maintenance projects for the power industry can be undertaken on a contract basis. Turbine Services brings significant technical and logistical advantages, where all of our individual support services are brought together to deliver a custom-made project package that meets scheduled contract availability and efficiency targets. These are normally guaranteed by statute under the terms of the contract. Services include:

- Organisation & planning
- Operations procedures
- Maintenance & preventive maintenance procedures
- Safety procedures, for both plant integrity and health & safety
- Dispatch, distribution and inspection

TURBINE SERVICES is a global provider to owners and operators of industrial gas turbines, offering an employee skill-base in excess of 2,000 man-years of experience in gas turbine maintenance solutions. With our heritage in John Brown Engineering, our primary specialization is in the heavy duty frame range of GE designed gas turbines.

Our business is founded on the strength of our technical and engineering capability, reinforced by our commitment to quality and customer satisfaction that is demonstrated by our accreditations (ISO 9001:2000) and registrations (Achilles, Supply Line, FPAL and Repro).

In addition to our extensive experience, our customers also benefit from the high-tech capabilities of our parent company, Chromalloy. Leading the industry in advanced technology derived from 60 years of aero and industrial gas turbine component experience, we offer state-of-the-art component, repair, coating and manufacturing technologies.

Turbine Services is a division of Chromalloy Gas Turbine Corporation with interests in the global Aero & Industrial Gas Turbine market sector.

Services include:

- Plant operation & maintenance
- Field & engineering support
- Component refurbishment
- Replacement spare parts
- Turbine control systems
- Plant operator training
- Rotor Overhaul
- Condition Monitoring
- Long Term Service Agreements
- Turbine Refurbishment
